A two-volume collection of all the State quarters the US Mint produced from 1999 to 2008. There is a page for each state, with details about each quarter's design and a short history of the state. Each page contains two Brilliant Uncirculated quarters (Philadelphia and Denver Mints) and two or three mint-state postage stamps related to the state. Some of these stamps were produced many years ago. Photos of the Arizona page for an example.

The collection also includes pages and coins for the District of Columbia and each of the five US Territories. So, fifty-six pages and 112 coins altogether.
